[Crown of the Continent - Glacier National Park](#)

A showcase of melting glaciers, alpine meadows, carved valleys, and spectacular lakes. With over 700 miles of trails, Glacier is a paradise for adventurous visitors seeking a landscape steeped in human culture. Relive the days of old through historic chalets, lodges, and the famous Going-to-the-Sun Road.

When does Going-to-the-Sun Road open or close?

The road is open year-round near the West Entrance. The entire road does not usually open until **mid to late June**. Please see the map above for the most up-to-date information. The alpine sections of Going-to-the-Sun Road typically close for the winter around the third Monday of October, but this can happen earlier due to wintery weather.

Cell service is unreliable and often unavailable

Plan accordingly and unplug as much as possible while you're enjoying nature's beauty.

[Bicycling in Glacier National Park](#)

Each year an increasing number of bicyclists visit Glacier. Most seek to ride portions of the Going-to-the-Sun Road, recognized as an engineering marvel, during the early season while cars are restricted due to plowing operations. Regardless of where you ride, be sure to gather seasonal information such as available services, bicycling restrictions, area closures, and road and weather conditions.

Only those experienced at riding with heavy vehicle traffic in two directions should consider bicycling on Going-to-the-Sun Road during peak summer season.
